SATURDAY, SEPTEMBER 23
RADIOLOGY UPDATE: NAVIGATING IMAGING FOR THE PRIMARY CARE PHYSICIAN

Program Description

Radiology for the Primary Care Physician is the first conference of its type being offered here in Western Canada. Attendees will have the chance to interact with radiologists, including two dedicated "Ask me anything" sessions with questions answered by imaging specialists in Edmonton. This conference will be held at the Robbins Learning Centre Royal Alexandra Hospital.

All ten session topics have been chosen in conjunction with a team of family medicine physicians and all talks will be given by MIC radiologists who staff both the city's academic/teaching and community hospitals as well as many clinics around town. Highlights include approaches to common neurologic, musculoskeletal, body, and interventional radiologic concerns. All sessions are specifically tailored for primary care physicians and include a Q&A session.

This Group Learning program meets the certification criteria of the College of Family Physicians of Canada for Group Learning and has been certified by Continuing Professional Development, Faculty of Medicine, University of Toronto and L^3, Faculty of Medicine & Dentistry, University of Alberta for 6.25 Mainpro+ credit

Our conference registration page can be found
on our www.mic.ca website under the “for practitioners” tab

Thank you

0730 Registration & Breakfast
